West Nile Virus

June 24, 2013

Surveillance

This is the third week of mosquito surveillance. Mosquitoes were collected from a total of 71 gravid traps on two consecutive days then tested in-house for West Nile virus.

Mosquitoes:

Week 25 (06/17/13 –06/21/13)	
Total Collections (Number of Traps X Frequency of Collection)	142
Number of Female <i>Culex</i> Trapped and Tested	1319
Number of Pools Tested	116
Number of Pools Positive	0
Number of Community Areas with Positive Mosquitoes Pools	0
Cumulative Totals	
Total Collections (Number of Traps X Frequency of Collection)	426
Number of Female <i>Culex</i> Trapped and Tested	3349
Number of Pools Tested	314
Number of Pools Positive	0
Number of Community Areas with Positive Mosquitoes Pools	0

Community Areas: No community areas with WNV-positive mosquitoes.

Dead birds: 4 birds collected and submitted during week 24 tested negative.

Humans: No human cases reported.

Risk Assessment

The risk of West Nile virus infection continues to be low.

Larval and Adult Mosquito Control Efforts

No larvaciding or adulticiding efforts during week 25.
